Notes

- 1. With the computerization of stock trading, in principle, account managing agencies (securities companies and other parties) where shareholders maintain accounts perform various procedures, including procedures for changing shareholder addresses and requesting share purchases. Please ask the securities company where you maintain an account about these procedures. Please note that the holder of the list of shareholders (Mitsubishi UFJ Trust and Banking Corporation) does not offer any of these services.
- 2. Mitsubishi UFJ Trust and Banking Corporation has been appointed as the account managing agency for the procedures associated with shares recorded in special accounts. Please ask the account managing agency for special accounts stated above (Mitsubishi UFJ Trust and Banking Corporation) about such procedures. Mitsubishi UFJ Trust and Banking Corporation branches across Japan serve as intermediaries for these procedures.
- 3. The main and branch offices of Mitsubishi UFJ Trust and Banking Corporation pay dividends receivable.

68th Term Business Report

January 1, 2018 - December 31, 2018

Image of BALLOON HAND

Caring about people and make great efforts to weave together our creative ideas with the requirements of our customers while we contribute greater value to society.

Myotoku Group

Corporate Mission

- Caring about our customers.
- Offering each of our employees optimum working conditions and working environment.
- Carrying out development by integration of individual ideas and customers requirements.
- Promoting alliances with other companies, and sharing the benefits obtained from it.

- Transparency of management.
- Giving importance to internal communication such as reporting, informing and consulting.
- Promoting a professional relationship in which each and everyone can trust and rely on each other.

We are pleased to present our results for the 68th term from January 1, 2018 to December 31, 2018. We also take this opportunity to express our sincere appreciation to our shareholders

for their support.

social trust and sustainable corporate growth.

Koji Ise, President and Representative Director

Please describe the business results of the 68th term.

The Group's consolidated net sales for the 68th term reached 2,752 million yen, an increase of 5.3% year on year. In the Japanese market, on the back of increased demand for various semiconductors and electronic components, there was increased production and robust maintenance demand for related facilities, but the growth slowed in the second half of the year. However, by conducting product development and sales activities corresponding to the trend of automation of various production facilities, the Company's domestic net sales reached 1,906 million yen, an increase of 6.1% year on year.

Overseas, in the South Korean market, although there were large fluctuations regarding capital investment in the major semiconductor and flat panel display industries, and conditions were unstable, we

Under the slogan "CONVUM, Suction cup No. 1," we will continue offering attractive products to ensure

actively launched new products tailored to each industry, and expanded utilization to the general industrial equipment industry. As a result, sales in the South Korean market increased 2.2% year on year to 483 million yen. Sales in the Chinese market decreased 13.7% year on year to 194 million yen, as a result of the impact of a significant decrease in capital investment due to trade friction. In other areas, in the Southeast Asian markets, we actively raised demand for electric component-related equipment and launched products of automobilerelated equipment centering on Thailand and its neighboring countries. In the U.S. market, we have been engaged in the strengthening of services and cultivation of new customers at existing stores. As a result, sales increased 41.0% to 167 million ven. In terms of profitability, consolidated ordinary income declined 8.2% year on year to 423 million yen and profit attributable to owners of parent increased 2.6% to 310 million ven.

Please describe your performance forecasts and major initiatives for the fiscal year ending December 31. 2019.

For the fiscal year ending December 31, 2019, we expect to record consolidated net sales of 2.716 million yen, consolidated ordinary income of 444 million yen and profit attributable to owners of parent of 301 million ven. To achieve these targets, we will execute the following initiatives.

With regard to sales and development activities, we will continue to increase staff and also focus on human resources development, in order to reinforce our overall structure. We aim to increase our share. by launching new products throughout the group tailored to the needs of major industries we sell to, and conducting product differentiation based on the motto of developing unique products. In addition, as demands of robots rise, along with the development of Robot Hand (the parts that are to be the hands of robots), as well as constructing a collaborative

framework with robot makers, we will actively participate in related exhibitions and promote sales expansion efforts. In addition to strengthening the foundational research of our main products, we will conduct product development that respond to the market needs for IoT, etc. We will develop the domestic market with a view to global development utilizing the Company's local subsidiaries overseas, and in the medium term, aim to expand our overseas sales ratio to 50%.

On the manufacturing side, we will make capital investments actively, continue to strengthen our ability to meet delivery requirements by improving productivity and utilizing systems. Thus, we aim to strengthen cost competitiveness and to improve customer satisfaction. In addition, we will strengthen our training structure in order to inherit technology and techniques. Moreover, amid efforts to increase overseas production, we will also work to strengthen quality control systems.

03

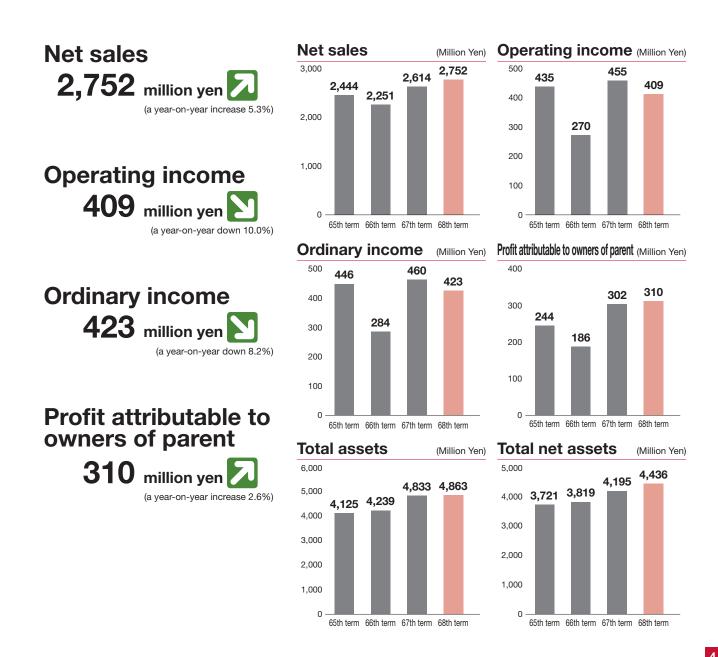

Finally, please provide your message to shareholders.

To fulfill the expectations of our shareholders and other stakeholders, the Group will continue to seek sustainable growth and enhance its corporate value. To achieve this, we will actively promote new product development and market introduction, which is the basis for manufacturers.

Regarding the distribution of profits to shareholders, we make it a basic policy to ensure returns to shareholders according to business results, with a target payout ratio of 25% on a consolidated basis.

In line with this policy, for the 68th term, we would like to propose an annual dividend equivalent to 11.00 ven per share before the consolidation of shares, or 55.00 yen per share after the consolidation of shares, respectively. This consists of an interim dividend of 5.00 ven per share and a vear-end dividend of 30.00 ven per share.

We will devote our full energies to achieving management objectives to meet the expectations of all of our shareholders, and therefore sincerely ask for the continued and unwavering support and cooperation of our shareholders.

Consolidated net sales of this product segment for the vear under review amounted to 857 million ven as a result of heightened demand in electric component-related industries in the South Korean and Southeast Asian markets driving an increase in demand from manufacturers of semiconductor production equipment. Due to an increase in the ratio of FA equipment and others, the sales distribution ratio of this product segment was 31.1% of overall product sales, down 1.3 percentage points year on year.

As was the case with CONVUM electors, as demand from manufacturers of semiconductor production equipment heightened due to the increased demand in electric component-related industries, consolidated net sales of this product segment for the year under review amounted to 275 million yen. The sales distribution ratio was 10.0% of overall product sales, remaining unchanged year on year.

Due to the increase in capital investment demand, sales to all industries remained steady. In addition, as a result of active market introduction of new products in robot-related industries, consolidated net sales for the year under review amounted to 1,286 million yen. The sales distribution ratio of this product segment was 46.8% of overall product sales, down 3.0 percentage points year on year.

FA equipment and others Net sales: 332 million yen Sales distribution ratio 12.1%

For general equipment, such as vacuum-related equipment and vacuum pumps, net sales were down from the previous fiscal year. However, regarding sales of our CONFLOAT Levitation Transfer Units to manufacturers of flat panel displays and related products, demand for capital investment increased mainly in the Asian region, and consolidated net sales of this product segment for the year under review amounted to 332 million yen. The sales distribution ratio of this product segment was 12.1% of overall product sales, up 4.3 percentage points year on year.

CONVUM_® is a vacuum generator that uses compressed air to generate suction (negative pressure). Compressed air is released (ejected) from the nozzle, therefore earning the name "ejector" or "ejector pump."

About CONVUM

CONVUM_®: CONVUM is a coined word created by combining the imageries of the generation of vacuum with compressed air from a compressor. CONVUM_® is a registered trademark of the Company.

PAD

The pad is a product that utilizes the suction (negative pressure) obtained from a vacuum generator, such as CONVUM® to adsorb and lift workpieces (adsorbate). Other than the "pad," it is also called "vacuum pad," "suction pad," "suction cup," or "cup." The pad acts as that of a human "hand" or "finger."

Pressure Sensor measures a pressure displacement with internal pressuresensitive element, then converts and outputs electrical signal. Our company's pressure sensors, which focus on air pressure, are used for a variety of applications including suction confirmation, seating confirmation, and source pressure management.

Non-contact

Equipment that conveys and suctions workpieces (conveyed objects, adsorbates) in a non-contact (floating) state by supplying compressed air and utilizing the properties of air. It is used for conveying workpieces that cannot be conveyed by rubber pads such as liquid crystal glass, film. electronic substrates. etc.

As factory automation equipment, our products are incorporated into various manufacturing processes and equipment for various industries.

The Myotoku Group's products

and technologies are deployed in

an extensive range of industrial

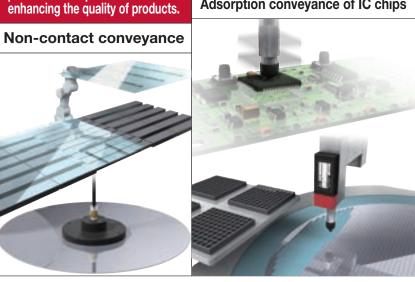

applications on production sites, contributing to the automation of

production processes and

Making boxes out of packaging materials

Adsorption conveyance of IC chips

Topics Active participation in exhibitions and launch of new products

In October last year, we participated in "TOKYO PACK 2018." Due to the decrease in the size of the working population, from the food industry to the packaging-related industry, demand for industrial robots have heightened worldwide. We exhibited the demo machine, jointly sponsored by a robot manufacturer, of "SGB series: BALLOON HAND," which was developed as a product unique to the Company, and attracted considerable interest.

The said product integrates our vacuum absorption technologies with new technologies, which allows it to grasp objects that it was not able to hold before. We also received a large amount of attention for the exhibition of "SGP series: PALLETCHER," which can hold even heavy objects such as cardboard boxes and steel plates, as well as objects with an uneven surface. The Company's products are increasingly becoming indispensable for robotic automation. We will continue to increase the variety of products going forward, to achieve compatibility with various types of robots and applications. We will also actively engage in cooperation and technological collaborations with each robot manufacturer and companies aiming for the full automation of the manufacturing site.

A hand with a new structure that can grasp workpieces that previous versions could not SGB series: BALLOON HAND
